

**Dr. Karen Davison, PhD - Equine Nutritionist**

Dr. Karen Davison is an Equine Nutritionist and Sales Support Manager with Purina Animal Nutrition, LLC. She received her Master of Science degree and PhD in Equine Nutrition from Texas A&M University. Dr. Davison's research included some of the early effect of fat-added diets on reproduction and lactation in broodmares and effects of fat-added diets on growth, bone development and thyroid hormones in weanling horses.

She spent eight years with the Texas Agricultural Extension Service in the State Horse Specialist Office prior to joining Purina 22 years ago. Dr. Davison is published in scientific journals, has authored numerous magazine articles and presented at regional and nation veterinary meeting on equine nutrition topics. She and her family are involved with breeding, training and competing in the cutting and rodeo performance horse industries.
